Author Index Volume 142 (2002)

Akkouchi, M., On a result of W.A. Kirk and L.M. Saliga (*Short communication*) 445–448
Alon, N. and **V. Asodi,** Sparse universal graphs 1– 11
Asodi, V., see **Alon, N.** 1– 11

Benammou, S. and **K. Omrani,** A finite element method for the Sivashinsky equation 419–431
Blanes, S. and **P.C. Moan,** Practical symplectic partitioned Runge–Kutta and Runge–Kutta–Nyström methods 313–330

Calkin, N.J., J.D. Edds and **D.R. Shier,** Cancellation in cyclic consecutive systems 13– 26
Cvijović, D. and **J. Klinowski,** Integral representations of the Riemann zeta function for odd-integer arguments (*Short communication*) 435–439

De Matteis, A. and **S. Pagnutti,** Pseudorandom permutation 367–375
Devroye, L., Laws of large numbers and tail inequalities for random tries and PATRICIA trees 27– 37
Diethelm, K., Erratum to "Error bounds for spline-based quadrature methods for strongly singular integrals" [J. Comput. Appl. Math. 89 (1998) 257] (*Erratum*) 449–450
Driver, K. and **M. Möller,** Quadratic and cubic transformations and zeros of hypergeometric polynomials 411–417
Duckworth, W., N.C. Wormald and **M. Zito,** Maximum induced matchings of random cubic graphs 39– 50

Edds, J.D., see **Calkin, N.J.** 13– 26

Goh, W. and **E. Schmutz,** Limit distribution for the maximum degree of a random recursive tree 61– 82
Goh, W.M.Y., On a generalization of Polya inequality and some of its statistical implications 51– 59
Groeneboom, P., Hydrodynamical methods for analyzing longest increasing subsequences 83–105

Hitczenko, P., C. Rousseau and **C.D. Savage,** A generating functionology approach to a problem of Wilf 107–114

Jagger, C. and **A. Thomason,** Wavelength routing in optical networks of diameter two 115–124

Karoński, M. and **T. Łuczak,** The phase transition in a random hypergraph 125–135
Klinowski, J., see **Cvijović, D.** 435–439
Kouibia, A. and **M. Pasadas,** Approximation of curves by fairness splines with tangent conditions 357–366

Li, Z.C. and **N. Yan,** New error estimates of bi-cubic Hermite finite element methods for biharmonic equations 251–285
Louchard, G., Runs of geometrically distributed random variables: a probabilistic analysis 137–153
Łuczak, T., see **Karoński, M.** 125–135

Mahmoud, H. and **T. Tsukiji,** On the internal structure of random recursive circuits 155–171
McNamee, J.M., A 2002 update of the supplementary bibliography on roots of polynomials 433–434
Michael Steele, J., The Bohnenblust–Spitzer algorithm and its applications 235–249
Möller, M., see **Driver, K.** 411–417
Moan, P.C., see **Blanes, S.** 313–330
Mutafchiev, L.R., On the size of the Durfee square of a random integer partition 173–184

Neininger, R., On binary search tree recursions with monomials as toll functions 185–196

Omrani, K., see **Benammou, S.** 419–431

Pagnutti, S., see **De Matteis, A.** 367–375
Panario, D., Asymptotics of subtracted singularities for generating functions with small singularities 197–209
Panholzer, A. and **H. Prodinger,** Binary search tree recursions with harmonic toll functions 211–225
Pasadas, M., see **Kouibia, A.** 357–366
Prodinger, H., see **Panholzer, A.** 211–225

Rhee, W.T., Disjoint random needles 227–234
Rousseau, C., see **Hitczenko, P.** 107–114

PII: S0377-0427(02)00449-1

Sánchez Lara, J.F., On the asymptotic expansion of the entropy of Gegenbauer polynomials 401–409
Savage, C.D., see **Hitczenko, P.** 107–114
Schmutz, E., see **Goh, W.** 61– 82
Shier, D.R., see **Calkin, N.J.** 13– 26
Srivastava, H.M., Remarks on a sum containing factorials (*Short communication*) 441–444
Szafnicki, B., A unified approach for degree reduction of polynomials in the Bernstein basis Part I: Real polynomials 287–312

Tang, H.-C., Combined random number generator via the generalized Chinese remainder theorem 377–388
Thomason, A., see **Jagger, C.** 115–124
Tsukiji, T., see **Mahmoud, H.** 155–171

Wong, P.J.Y., Abel–Gontscharoff boundary value problems on measure chains 331–355
Wormald, N.C., see **Duckworth, W.** 39– 50

Xiao, P., see **Zhao, H.-x.** 389–400

Yan, N., see **Li, Z.C.** 251–285

Zhao, H.-x., G.-q. Zhu and **P. Xiao**, A backward three-term recurrence relation for vector valued continued fractions and its applications 389–400
Zhu, G.-q., see **Zhao, H.-x.** 389–400
Zito, M., see **Duckworth, W.** 39– 50
